Professional Summary

Results-driven **MERN Stack Developer** with hands-on experience engineering scalable full-stack web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**. Proficient in REST API design, JWT authentication, RBAC, Redux Toolkit state management, and CI/CD-based cloud deployment via Render and Vercel. Actively seeking a **Software Engineer / Full Stack Developer Intern** role to contribute production-grade solutions and grow within an Agile engineering team.

Education

Bachelor of Technology - Bharath Institute of Higher Education And Research- Chennai **CGPA - 8.0 /10.0**
• Computer Science and Engineering – Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming Sep 2023 – May 2027(Expected)
Board of Intermediate Education -Aditya Junior College -Amalapuram **Percentage - 85.7**
• Math Physics Chemistry Sep 2021 – Mar 2023

Work Experience

MERN Full Stack Development Intern **EduSkills Academy - Mar 2026**
• Engineered and deployed two production-grade full-stack applications – an **E-Commerce Platform** and a **Text Search Indexer** – using the MERN stack (React.js, Node.js, Express.js, MongoDB) within a 10-week Agile sprint cycle
• Architected **RESTful APIs** with **JWT-based authentication** and refresh token mechanisms for secure user access.
• Implemented application-wide state management using **Redux Toolkit**, streamlining data flow across 15+ components and eliminating prop-drilling across nested UI layers

Projects

(MERN Stack · JWT · RBAC · Cloudinary · Render · MongoDB Atlas) **Job Application Portal**
[Live Demo](#) | [GitHub](#) Mar 2026
• Architected a recruitment platform with **RBAC**, supporting **Job Seeker** and **Recruiter** workflows through role-based access control and dynamic UI rendering.
• Designed and implemented **20+ RESTful API endpoints** with JWT-based authentication and **Cloudinary** integration for secure document management.
• Configured **GitHub Actions CI/CD pipelines** and optimized **MongoDB data models** with Redux Toolkit state management, improving deployment efficiency and application performance.

(React 18 · Vite · Material UI · Redux Toolkit · Formik · Nivo Charts · Vercel) **React Admin Dashboard**
[Live Demo](#) | [GitHub](#) 2025
• Built a **responsive admin dashboard** with Dark/Light mode support, optimized using **Vite** and route-level code splitting.
• Integrated **Nivo Charts** and **FullCalendar** components to implement real-time analytics dashboards, data visualization modules, and event scheduling functionality.
• Implemented schema-based validation using **Formik and Yup**, and configured automated **CI/CD pipelines** with GitHub Actions and Vercel for continuous deployment.

Skills

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3
- **Frontend:** React 18, Redux Toolkit, Vite, Material UI, Tailwind CSS, Formik, Nivo Charts, FullCalendar, Responsive Design
- **Backend:** Node.js, Express.js, REST API Design, JWT Authentication, RBAC, MongoDB, MongoDB Atlas
- **DevOps & Tools:** Git, GitHub, GitHub Actions, CI/CD Pipelines, Render, Vercel, Cloudinary, Postman, VS Code
- **Concepts:** OOP, Data Structures & Algorithms, MVC Architecture, Scalable System Design, Code Review

Certifications

- **HackerRank** – [JavaScript \(Basic\)](#), [Node.js \(Basic\)](#), [CSS \(Basic\)](#)
- **CodeChef** – Python Fundamentals & Problem Solving [Certificate](#)

Hackathons & Achievements

- **RIFT'26 Hackathon** – Engineered a functional prototype within a time-constrained 24-hour sprint environment, demonstrating rapid full-stack development and collaborative problem-solving [Certificate](#)
- **Vishwanova 2026 – National-Level Project Competition** at MIT-WPU, Pune – Presented an industry-applicable full-stack solution as a member of **Team CODEX** in a competitive national-level engineering showcase
